K I E R T O – the recycle rack system

LOOKBOOK

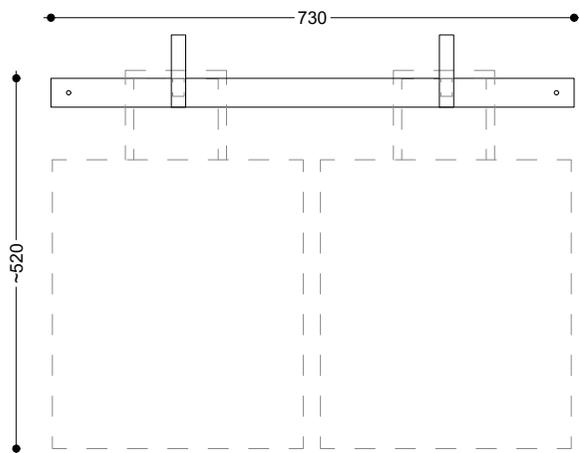

The RUUT Kiertö recycle rack system is designed to make the sorting of recyclable materials easy. The system's bags are made from recycled tarps and are available in 5 specific colours. The durable and multi-purpose bags can be washed by hand.

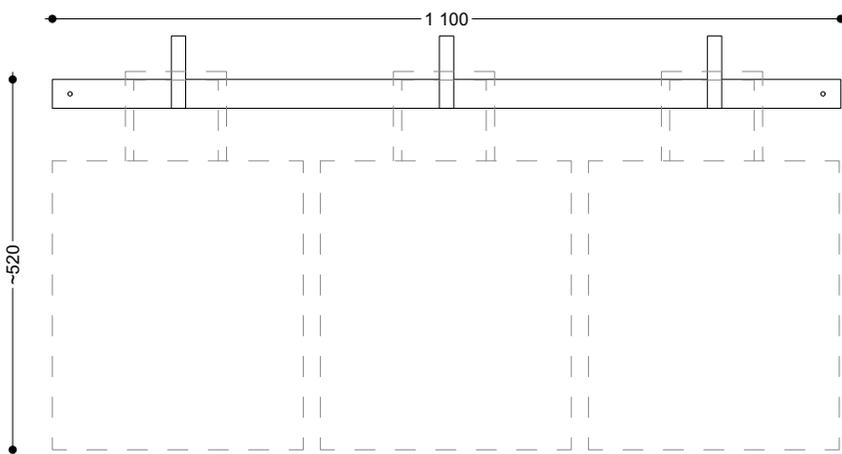

The wooden parts of the RUUT Kiertö recycle rack system are made from domestic birch or oak. Made from surplus wood of domestic carpentry workshops, they are treated with beeswax and painted hand with domestic linseed oil paint.
