K I E R T O – the recycle rack system

LOOKBOOK

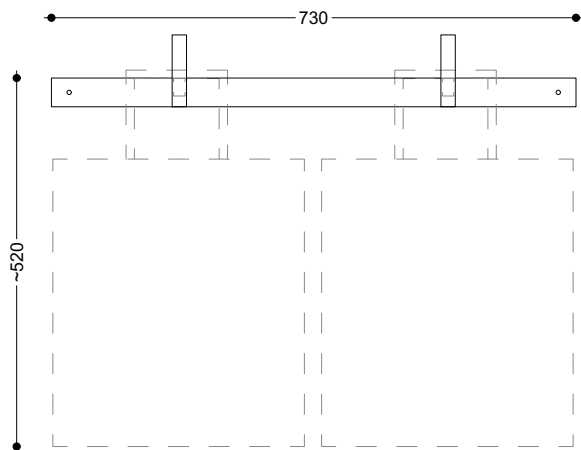

The RUUT Kierto recycle rack system is designed to make the sorting of recyclable materials easy. The system's bags are made from recycled tarps and are available in 5 specific colours. The durable and multi-purpose bags can be washed by hand.

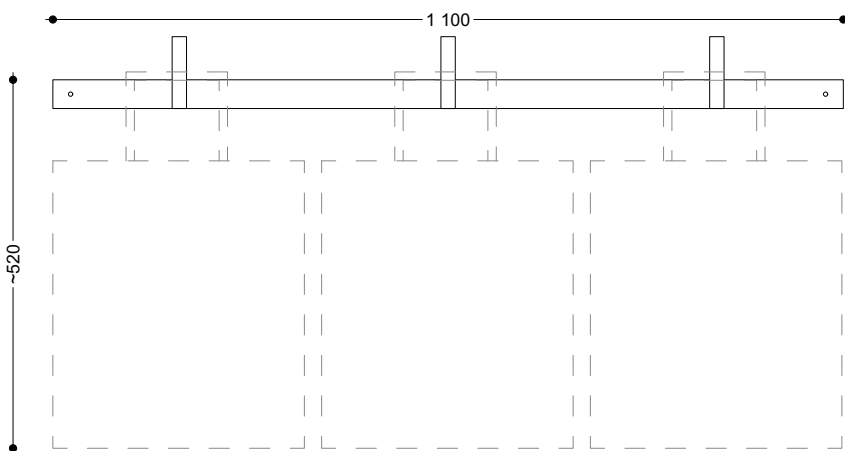

For our customers in Switzerland, we have with Humanitas Horgen for production and KT Colors as custom paint manufacturer gladly found two Zürich partners. For the production of the Ruut Kierto Swiss Edition recycle rack we use high-quality Swiss maple wood. This is treated with local beeswax and painted by hand with acrylic paint.
